PROFESSIONAL SUMMARY

Backend-focused developer who enjoys designing scalable systems, dependable APIs, and practical interfaces that feel organized instead of crowded. Experienced in full-stack web applications, Flutter mobile products, Firebase-backed workflows, database design, authentication, and machine learning/NLP pipelines.

TECHNICAL SKILLS

JavaScript, React, Express, Node.js, Python, Machine Learning, Flutter, Git, MySQL, PostgreSQL, MongoDB, Prisma ORM, Firebase, Docker, Kubernetes, Figma

PROFESSIONAL EXPERIENCE

Web Full Stack Developer | Freelance

2023 - Present | Remote

- Developed full-stack web applications using React, Node.js, and MongoDB.
- Designed RESTful APIs and database schemas for small-to-mid scale products.
- Implemented authentication, role-based access, and audit-friendly logging.
- Optimized query performance and improved API response times.

Mobile App Developer (Flutter) | Freelance

2024 - Present | Remote

- Built cross-platform mobile applications using Flutter and Dart.
- Integrated RESTful APIs and third-party services for dynamic content.
- Implemented state management solutions (Provider, Riverpod) for scalable app architecture.
- Optimized app performance and reduced load times through efficient coding practices.

IT Support | Kantor Notaris Fransisca Panjaitan, S.H., M.Kn.

2021 - Present | Remote

- Provided technical support and troubleshooting for office IT infrastructure.
- Managed software installations, updates, and user access controls.
- Assisted in the transition to remote work setups and cloud-based collaboration tools.

SELECTED PROJECTS

Go Toba | Mobile Developer | January 2024

Tech: Flutter, Firebase

Go Toba is a Flutter-based mobile tourism application for the Lake Toba region that integrates login, personalised recommendations, hotel/ticket bookings, virtual account payments, transaction history and reviews, and the sharing of travel moments in a single Firebase-based platform with a bilingual interface and consistent UI.

- User authentication and account lifecycle with Firebase Authentication (email/password, Google Sign-In, Facebook login), plus email verification and password reset flows.
- Persistent user session and app preferences using shared_preferences (login state, UID, selected language).
- Personalized home recommendations (hotels, culinary, destinations) powered by Cloud Firestore with

user tag-based matching logic.

- Hotel booking flow (date selection, room selection, payment method, virtual account, booking confirmation) built with Flutter UI + Cloud Firestore.

Code: github.com/bintangmcsinaga/Go-Toba

My Portfolio | Frontend Developer | January 2026

Tech: React Vite, JavaScript, CI/CD, VPS

My previous portfolio site focused on minimalism and typography.

- Minimalist landing page with typography-first visual hierarchy.
- Custom section transitions and responsive spacing system.
- Lightweight architecture optimized for static hosting.
- CI/CD pipeline for automated deployment to VPS hosting.

Code: github.com/bintangmcsinaga/Portofolio

AFB_SenA | Backend Developer, Machine Learning Engineer | June 2025

Tech: React, Express, FastAPI, MongoDB, Python, Machine Learning

AFB_SENA is an end-to-end sentiment analysis platform that unifies multi-platform data extraction, text preprocessing, sentiment labeling, and RoBERTa-based inference in a single web workflow.

- Authentication (login/register) + protected routes: Express.js, MongoDB/Mongoose, JWT, bcryptjs, React Router (ProtectedRoute).
- YouTube, Play Store, X comment extraction: FastAPI, google-api-python-client, pandas, Excel export.
- HTML element cleansing: BeautifulSoup4 via /clean-html endpoint + preprocessing UI pipeline.
- Text normalization & slang expansion: regex, contractions, custom slang dictionary (kamus_slang.py) via /clean-text.

Code: github.com/bintangmcsinaga/sistem-rekomendasi-pariwisata-danau-toba

Remind | Mobile Developer | March 2026

Tech: Flutter, Firebase, NLP-based

Remind is a Flutter app where users write free-form activity notes that are analyzed to detect habits, predict the next occurrence, and send automatic reminders.

- Long text note input (single multi-line field).
- Create, edit, delete, and list notes.
- Rule-based NLP to detect activity and category from notes.
- Notifications/reminders driven by predictions.

Code: github.com/bintangmcsinaga/remind
